BUYING THE RIGHT SUNSHINE COAST BUSINESS

If you're looking to buy into a business, then it's a steep road ahead.

The time, effort and finances that go into a new business venture are considerable, and the choice you make in which business you buy can make all the difference.

In Australia, 6 out of 10 new businesses will shut their doors within their first 3 years, so you need to ensure the business you're buying is going to survive, and thrive.

So what do you need to know to get into a business, and how can you ensure you're buying the right one for you at a fair price? What support do you need, what advice should you seek, what can you do yourself, and where can things go horribly wrong?

Join our panel of experts from the finance, legal, accounting and business advisory communities as we share our experience and advice for new prospective business owners. We may be able to point you on a successful path to business ownership, and just may be able to help you avoid a life-altering mistake.

HERE'S WHAT YOU'LL LEARN:

- What type of business is best for you and your lifestyle?
- How can you judge if a business for sale is sound and whether it's worth the asking price?
- What due diligence do you need to put into a business purchase?
- What finance can you get for a new business purchase, and what are financiers looking for?
- What business structure is best for your circumstances?
- How much cashflow do you need, and how do you calculate your break-even point?
- What risks can you plan for and how can you minimise your exposure?
- What information do you need to know about the business, and what should you ask for?
- What information you will need to complete the contract, and what timeframes should you aim for?
- How to plan for a good transition between business owners
- · What to expect the first few months, and how to plan for success
